

Drug Class:	ANTI-INFLAMMATORY	
Criteria:	If the patient has tried at least 2 Step 1 drugs in the past 120 days, then authorization for a Step 2 drug may be given	
Step 2 Medications:	CIMZIA	XELJANZ
	ORENCIA	XELJANZ XR
Step 1 Medications:	(Below are the drugs that must be tried before a step 2 drug is considered)	
	AZATHIOPRINE	METHOTREXATE
	ENBREL	REMICADE
	HUMIRA	

Drug Class:	ARBS	
Criteria:	If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given	
Step 2 Medications:	EDARBI	
	EDARBYCLOR	
Step 1 Medications:	(Below are the drugs that must be tried before a step 2 drug is considered)	
	AMLODIPINE BESYLATE/VALSARTAN	LOSARTAN
	AMLODIPINE/OLMESARTAN	LOSARTAN/HCTZ
	AMLODIPINE/VALSARTAN/HCTZ	MOEXIPRIL/HCTZ
	BENAZEPRIL/HCTZ	MOEXIPRIL
	BENAZEPRIL	OLMESARTAN/AMLODIPINE/HCTZ
	CANDESARTAN/HCTZ	OLMESARTAN/HCTZ
	CANDESARTAN	OLMESARTAN
	CAPTOPRIL/HCTZ	QUINAPRIL/HCTZ
	CAPTOPRIL	QUINAPRIL
	ENALAPRIL/HCTZ	RAMIPRIL
	ENALAPRIL	TELMISARTAN/AMLODIPINE
	EPROSARTAN	TELMISARTAN/HCTZ
	FOSINOPRIL/HCTZ	TELMISARTAN
	FOSINOPRIL	TRANDOLAPRIL
	IRBESARTAN/HCTZ	VALSARTAN HCTZ
	IRBESARTAN	VALSARTAN
	LISINOPRIL/HCTZ	
	LISINOPRIL	

Drug Class:	BYSTOLIC	
Criteria:	If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given.	
Step 2 Medications:	BYSTOLIC	
Step 1 Medications:	(Below are the drugs that must be tried before a step 2 drug is considered)	
	ACEBUTOLOL	NADOLOL
	ATENOLOL	PINDOLOL
	BETAXOLOL	PROPRANOLOL
	BISOPROLOL FUMARATE	PROPRANOLOL ER
	CARVEDILOL	SORINE
	ESMOLOL	SOTALOL
	LABELALOL	SOTALOL (AF)
	METOPROLOL SUCCINATE ER	TIMOLOL MALEATE
	METOPROLOL TARTRATE	

Drug Class:	CNS STIMULANTS	
Criteria:	If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given	
Step 2 Medications:	DAYTRANA STRATTERA	
Step 1 Medications:	(Below are the drugs that must be tried before a step 2 drug is considered)	
	AMPHETAMINE/DEXTROAMPHETAMINE	METADATE ER
	DEXEDRINE	METHAMPHETAMINE
	DEXMETHYLPHENIDATE (IR/ER)	METHYLPHENIDATE (IR/CD/ER/SR)
	DEXTROAMPHETAMINE SULFATE	ZENZEDI

Drug Class:	COPAXONE	
Criteria:	If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given	
Step 2 Medications:	COPAXONE 40MG	
Step 1 Medications:	(Below are the drugs that must be tried before a step 2 drug is considered)	
	COPAXONE 20MG	

Drug Class: DIFICID

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications: DIFICID

Step 1 Medications: (Below are the drugs that must be tried before a step 2 drug is considered)

METRONIDAZOLE	VANCOMYCIN
METRONIDAZOLE IN NACL 0.7	

Drug Class: DPP-4

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications:

ALOGLIPTIN	KOMBIGLYZE
ALOGLIPTIN/METFORMIN	NESINA
KAZANO	ONGLYZA

Step 1 Medications: (Below are the drugs that must be tried before a step 2 drug is considered)

JANUMET	JENTADUETO
JANUMET XR	JENTADUETO XR
JANUVIA	TRADJENTA

Drug Class: MIGRAINE THERAPY

Criteria: If the patient has tried a Step 1 drug within the last 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications:

CAFERGOT	RELPAX
FROVA	ZOMIG NASAL SPRAY
MIGEROT	

Step 1 Medications: (Below are the drugs that must be tried before a step 2 drug is considered)

ALMOTRIPTAN	RIZATRIPTAN ODT
FROVATRIPTAN	SUMATRIPTAN
NARATRIPTAN	ZOLMITRIPTAN
RIZATRIPTAN	

Drug Class: NASAL STEROIDS

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications:

BECONASE AQ*	QNASL
DYMISTA	ZETONNA
OMNARIS	

*Will be approved first line for diagnosis of nasal polyps

Step 1 Medications: (Below are the drugs that must be tried before a step 2 drug is considered)

BUDESONIDE	FLUTICASONE
FLUNISOLIDE	TRIAMCINOLONE ACETONIDE

Drug Class: OPTHALMIC PROSTAGLANDINS

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given
Step 2 Medications: BIMATOPROST TRAVATAN Z
 LUMIGAN ZIOPTAN
Step 1 Medications: (Below are the drugs that must be tried before a Step 2 drug is considered)
 LATANOPROST

Drug Class: OSTEOPOROSIS AGENTS

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given
Step 2 Medications: BINOSTO
 FORTEO
 FOSAMAX +D
Step 1 Medications: (Below are the drugs that must be tried before a Step 2 drug is considered)
 ALENDRONATE RISENDRONATE
 ETIDRONATE SALMON CALCITONIN
 IBANDRONATE ZOLEDRONIC ACID
 PAMIDRONATE

Drug Class: TOPICAL ANTI-INFLAMMATORY AGENTS

Criteria: If a patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given
Step 2 Medications: VOLTAREN GEL
Step 1 Medications: (Below are the drugs that must be tried before a Step 2 drug is considered)
 DICLOFENAC (IR/ER/DR) MELOXICAM
 ETODOLAC (IR/ER) NABUMETONE
 FLURBIPROFEN NAPROXEN (ALL FORMS)
 IBUPROFEN OXAPROZIN
 KETOPROFEN (IR/ER) PIROXICAM
 MECLOPHENAMATE SULINDAC
 MEFENAMIC ACID TOLMETIN

Drug Class: ULORIC

Criteria: If a patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given
Step 2 Medications: ULORIC
Step 1 Medications: (Below are the drugs that must be tried before a Step 2 drug is considered)
 ALLOPURINOL
