Step 2 Medications: BYSTOLIC
 (Below are the drugs that must be tried before a step 2 drug is considered)

- Step 1 Medications:**
- | | |
|-------------------------|-----------------|
| ACEBUTOLOL | NADOLOL |
| ATENOLOL | PINDOLOL |
| BETAXOLOL | PROPRANOLOL |
| BISOPROLOL FUMARATE | PROPRANOLOL ER |
| CARVEDILOL | SORINE |
| LABETALOL | SOTALOL |
| METOPROLOL SUCCINATE ER | SOTALOL (AF) |
| METOPROLOL TARTRATE | TIMOLOL MALEATE |

Drug Class: CNS STIMULANTS

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications: DAYTRANA, STRATTERA
 (Below are the drugs that must be tried before a step 2 drug is considered)

- Step 1 Medications:**
- | | |
|----------------------------------|--------------------|
| DEXMETHYLPHENIDATE | METADATE ER |
| DEXMETHYLPHENIDATE ER | METHYLPHENIDATE |
| DEXTROAMPHETAMINE | METHYLPHENIDATE ER |
| DEXTROAMPHETAMINE ER | ZENZEDI |
| DEXTROAMPHETAMINE-AMPHETAMINE | |
| DEXTROAMPHETAMINE-AMPHETAMINE ER | |

Drug Class: DIFICID

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications: DIFICID
 (Below are the drugs that must be tried before a step 2 drug is considered)

- Step 1 Medications:** METRONIDAZOLE VANCOMYCIN

Drug Class: DPP-4

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications: ALOGLIPTIN KOMBIGLYZE
 ALOGLIPTIN/METFORMIN NESINA
 KAZANO ONGLYZA
 (Below are the drugs that must be tried before a step 2 drug is considered)

Step 1 Medications: JANUMET JENTADUETO
 JANUMET XR JENTADUETO XR
 JANUVIA TRADJENTA

Drug Class: MIGRAINE THERAPY

Criteria: If the patient has tried a Step 1 drug within the last 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications: MIGEROT
 RELPAX
 ZOMIG NASAL SPRAY
 (Below are the drugs that must be tried before a step 2 drug is considered)

Step 1 Medications: ALMOTRIPTAN RIZATRIPTAN
 ERGOTAMINE-CAFFEINE SUMATRIPTAN
 FROVATRIPTAN ZOLMITRIPTAN
 NARATRIPTAN

Drug Class: NASAL STEROIDS

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications: BECONASE AQ* QNASL
 DYMISTA ZETONNA
 OMNARIS

*Will be approved first line for diagnosis of nasal polyps
 (Below are the drugs that must be tried before a step 2 drug is considered)

Step 1 Medications: BUDESONIDE FLUTICASONE
 FLUNISOLIDE TRIAMCINOLONE ACETONIDE

Drug Class: OPTHALMIC PROSTAGLANDINS

Criteria: If the patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications: BIMATOPROST TRAVATAN Z
 LUMIGAN ZIOPTAN

(Below are the drugs that must be tried before a Step 2 drug is considered)

Step 1 Medications: LATANOPROST

Drug Class: OSTEOPOROSIS AGENTS

Criteria: If a patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications: BINOSTO
 FORTEO
 FOSAMAX + D
 (Below are the drugs that must be tried before a Step 2 drug is considered)

Step 1 Medications: ALENDRONATE RISEDRONATE
 ETIDRONATE ZOLEDRONIC ACID
 IBANDRONATE SALMON CALCITONIN
 PAMIDRONATE

Drug Class: ULORIC

Criteria: If a patient has tried a Step 1 drug within the past 120 days, then authorization for a Step 2 drug may be given

Step 2 Medications: ULORIC
 (Below are the drugs that must be tried before a Step 2 drug is considered)

Step 1 Medications: ALLOPURINOL
